- First you have to PRINT the page for each exercise, print exercise 01, you will see a blank page, no music or nothing, just the staff where you have to write some music.

- Then Click on the "Ear Training 01" and you will hear some music, think of it, as a little song. You need to be able to write down that song in your blank staff that you just printed. Bring the final song to your teacher, and he/she will tell you if it was right, if so, then you can move to the next, until you finish all of them.

The ideal time to finish this program is 5 months. A minimum of 20 :30 min. Lessons. It all depend in the student. Age, ability, practice time, interest, all these things make a big difference. Some students may take 6 months or more.

Once the student finish level 4, he/she will be ready to study level 5.

The goal of this program is to make sure the student is learning at the right level, if you have a kindergarten student and you make him study something from college, it will be impossible, too difficult, the student will quit. Or if you have a college student doing things from kindergarten it will be to boring, he will not learn more and he will quit. The best way is to balance the learning process so is challenging enough so they can learn more, but not so difficult that they want to quit.

Once you start the program, you need to finish the program to see results. Any student who finish the music program for level 4 of the California Music Conservatory at Easy Music School, will be prepare to play thousands of songs at that level.

## WARNING

Most people, young children and adults will finish level 1 and 2. Starting on level 3 and 4, the songs are a little bit longer, more difficult, a little bit faster, and require more practice. 10 or 20% will quit at this level, and they will never learn to play an instrument. Be patience and understand that takes time to complete this level. Please make sure you are one of the few that actually finish this level.
